## Bio-Green Ethanol-Based Windshield Washer Fluid

A new premium washer fluid, formulated with a renewable resource.

Bio-Green wash is ethanol-based – an environmentally preferred product that is rapidly biodegradable in surface water, groundwater and soil. Additive free and fragrance free, it is gentle on the environment without sacrificing cleaning power.

Bio-Green protects from freezing down to -30°C, de-ices windshields and removes road grime and salt without streaking.

Ready to use, this all-season alternative washer fluid is packaged in recyclable bottles and worth your investment.
