# OXI Green™ Multi-purpose Cleaner

For the DIYs, the challenge often lies in prepping surfaces for painting or cleaning up after the project is finished. You want a cleaner that starts to work on contact to remove stains, dirt and grime from project surfaces. Recochem's **OXI Green™** is an effective solution with 20% more serious OXI power additive than national brands\* – but without the high price tag.

### OXI Green™ advantages:

- Works on contact as it releases oxygen to oxidize and remove stains
- Multi-purpose cleaner for indoor or outdoor use on walls, floors, concrete, masonry and aluminum, vinyl or fiberglass siding
- Solvent-free product that is ideal for prepping paint surfaces
- Removes stains, dirt and grime from project surfaces
- Environmentally preferred product: biodegradable, chlorine-free and phosphate-free
- Packaged in a convenient 625 mL spray trigger bottle for targeted application

### How to use:

- Test for colourfastness prior to use
- Remove all loose dirt from area prior to application
- Apply product, let stand for 3 - 5 minutes, remove with absorbent cloth or colourfast sponge
- Rinse thoroughly with water and wipe dry

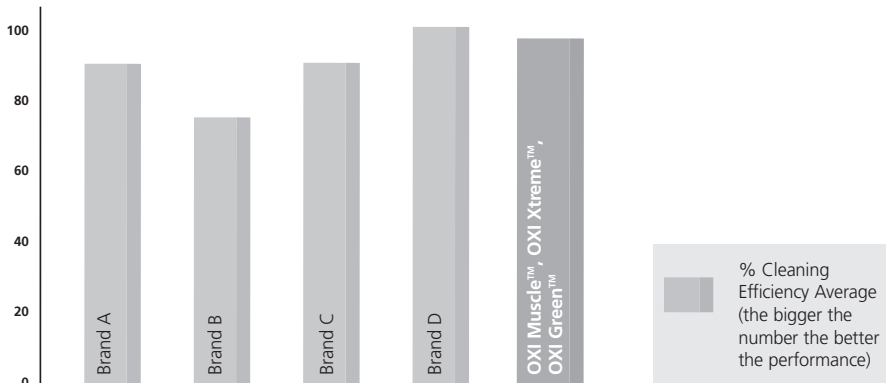

For best results, treat stain immediately. Some stains may cause permanent discoloration even after cleaning. For water washable surfaces only.

**Cautions:** DO NOT USE on non-colourfast surfaces or surfaces damaged by water, such as leather, wool and silk. Store upright in a cool, dry place. Do not mix with hypochlorite bleach or other household cleaners.

\*The information presented is believed to be statistically accurate. Actual results may differ.

### How we measure up:

#### ASTM D-4488 Test Method for Product Cleaning Performance
