PROUDLY MADE IN QUEBEC, CANADA

Proudly produced in Canada, Heirloom® products offer the assurance you are buying quality formulas.

4 EASY STEPS TO A PROFESSIONAL FINISH...

STEP 1

Apply a generous coating to the surface. Let stand for 10 to 20 minutes or until paint has softened.

STEP 2

Use a scraper, brush or steel wool to remove softened layers; or try rubbing the surface with sawdust.

STEP 3

Clean the area with a lint-free cloth dampened with stripper to remove all traces of loosened paint.

STEP 4

Wipe the surface clean with another cloth dampened with Recordsol Paint Thinner. When surface is dry, apply new finish.

Heirloom® will not harm veneer or raise the wood grain. **DO NOT** use on linoleum, asphalt, vinyl or rubber tiles. Avoid contact with rugs, floors, fabrics, plastics and fiberglass.

Caution: It is recommended to work in a well-ventilated area to avoid inhaling vapours. If working in an enclosed area, wear a mask designed for organic vapours.
