

SANITARY BLOCKS AND DEODORIZERS

PARA-ZENE® deodorizer blocks are an inexpensive and effective method of odour control in large and small areas. They are available in a variety of sizes, and some have powerful odour-fighting fragrances added. Each block is made of 99% pure Paradichlorobenzene which has exceptional powers to mask offensive odours. Paradichlorobenzene turns from solid to vapour at a rate which is **affected by ambient temperatures**.

***A standard deodorizer (urinal block), at room temperature, will take about 30 days to disappear. In a very warm environment, it may only last for three weeks. The amount of restroom traffic or usage of the urinals will also affect the lifespan of the sanitary block.**

URINAL BLOCKS

PARA-ZENE®

Designed for use with screens to trap litter, or in urinals equipped with a drain strainer.

Item#	Unit Size	Packaging	UPC#	SCC 14#	Usage*
